THE WORLD'S FIRST ECOSYSTEM OF BLOCKCHAIN SERVICES

Version 1.8 | August 27, 2021

## Blockchain is the basis of the digital economy

---

Blockchain is one of the most promising technologies of the 21st century. This technology is already called the engine of the 4th industrial revolution. And this is logical.

On the one hand, Blockchain provides many technical advantages - high speed of data transfer, cost reduction and elimination of errors in transactions.

On the other hand, this technology opens up global financial opportunities. It is Blockchain that is the basis of the digital economy, the profitability of which is many times higher than traditional markets.

## High complexity and high income

According to statistics, the profitability of DeFi and other areas of the Blockchain economy can reach 1000% per annum. However, such a high and even more stable indicator is practically inaccessible to an ordinary user.

The problem lies in the difficulty of understanding and the high risks of decentralized finance. That is why the attempts of many private investors end in failure.

We know this problem. And we have found the right solution.

ORION ECOSYSTEM

Orion is the world's first ecosystem of Blockchain services that affect various areas of user life. The main feature of the ecosystem is easy and quick access to all profitable areas of the digital economy.

The combination of complex technical mechanisms with a simple approach became possible thanks to the company's CEO - Brian McCrory. He has been launching and developing various businesses for more than 20 years.

Thanks to Brian McCrory, the Orion brand and its services are simple and conventional to every user.

## Legal Structure

Technical competence is only one side of the issue. When creating the ecosystem, we also carefully worked out the international legal structure. Now these are 4 companies in different parts of the world.

# Orion roadmap. 2Q 2022 - FUTURE

The main task of the Ecosystem is to constantly expand its capabilities, improving the quality of various areas of life. This is the reason for the constant growth in the scale and depth of our solutions - from the financial platform today to the world's first blockchain resort soon.

The background features a series of concentric circles in shades of blue and purple, creating a tunnel-like effect that draws the eye towards the center. The circles are semi-transparent and overlap, with a bright light source at the very center. The overall aesthetic is futuristic and high-tech.
